Open to remote and hybrid roles — Estimator · BIM Modeler · Technical Engineer · Structural Design Engineer

PROFESSIONAL SUMMARY

Licensed Civil Engineer and Master Plumber with two years of experience spanning groundwater engineering, construction dewatering, structural design, and international project delivery. Commercially responsible for SAR 52M+ in quoted dewatering and groundwater works across the UAE and KSA at WJ Groundwater Philippines Corp. — 60+ tender and proposal submissions with 4 contracts won. Managed three dewatering sites end-to-end and currently serving as acting Point of Contact for the Philippine Business Unit, engaging 25+ client companies on technical and commercial matters.

WORK EXPERIENCE

Technical Engineer / Project Engineer / POC Philippine BU

May 2025 – Present

WJ Groundwater Philippines Corp.

International Tenders — UAE & KSA

- Prepared and submitted 24+ technical quotations for dewatering and groundwater projects in the UAE and KSA with a combined value of SAR 45.5M + AED 6.55M, covering deep well, wellpoint, and construction dewatering systems for landmark programmes including NEOM, KAFD, EXPO 2030, and the Abu Dhabi–Dubai Railway Project.
- Contributed to winning 4 KSA contracts worth SAR 1.01M from submitted quotations, including dewatering packages for Oxagon (NEOM) and Almarai.
- Prepared method statements, hydraulic design packages, and tender documents for clients across KSA, UAE, and Philippines — including Tier-1 contractors L&T, Samsung C&T, and Hassan Allam.
- Represented the company in bidding presentations, including the Cebu–Mactan Bridge project and Pasig City Hall.

Business Unit Point of Contact (Acting Head) — WJ Group Philippines (Mar 2026 – Present)

- Appointed acting POC of the Philippine Business Unit within 10 months of joining — managing proposals, client meetings, and operations coordination while retaining full tendering and field engineering duties (third role assignment in one year).
- Delivered 43+ outputs in 65 days — 21 proposals and quotations, 7 client meetings, 6 operations meetings attended, 5 variation orders submitted, plus technical reports and site visits.
- Engaged 25+ client companies across construction, energy, and infrastructure — including Nestlé, Aboitiz, DMCI, Seatrium, FF Cruz, and the Philippine Army.

Field Project Engineering — Philippines

- Assigned as Project Engineer on three dewatering sites in the Philippines within one year.
- **CIA Station, MCRP CPN-04:** Engineer-in-charge for monitoring and maintenance of approximately 30 deep wells. Resolved a groundwater rise issue affecting cut-and-cover tunnel construction — validated the cause, recommissioned decommissioned wells, and enabled backfilling to resume.
- **CAA Pumping Station, Las Piñas (PHP 4M):** Managed a deep well dewatering system from drilling through commissioning as sole engineer, supervising multidisciplinary crews throughout.
- **Las Piñas Shaft Dewatering (PHP 11M):** Oversaw dewatering across 5 existing shafts, managing manpower and system performance throughout, revised work sequencing around access restrictions.

Technical Work

- Conducted seepage analysis using SEEP/W — pump sizing, drawdown calculations, and dewatering layout drawings in AutoCAD.
- Built VBA-driven Excel tools for progress reporting and timesheet management, reducing manual processing time by approximately 60–80%.
- Received Excellent / Exceeds Expectations performance rating at the 6-month evaluation.

Design & Cost Engineer I — Civil / Structural

June 2024 – May 2025

Macgraf Engineering & Construction

- Prepared structural design calculations using STAAD.Pro, verified in Excel and Mathcad.
- Produced structural plan sets, detailing, as-built drawings, and shop drawings in AutoCAD, SketchUp, and Revit.
- Handled structural and plumbing design for 15+ local and international building projects.
- Coordinated across architectural, mechanical, and electrical disciplines to resolve design issues.
- Prepared cost estimates and quantity take-offs for project bids and client proposals.

FEATURED PROJECT

DewaPrice — Full-Stack Dewatering Estimation Platform

dewaprice.vercel.app

- A production-grade engineering web app — live price database, automatic dewatering method recommendation, well layout diagram generation, and multi-currency BOQ export across PH, KSA, AE, CA, and UK.
- Built with JavaScript, PostgreSQL, Supabase, and Vercel using AI. Concept, engineering logic, and domain expertise by author.

PORTFOLIO

martinezcyrus.github.io

- AutoCAD drawings portfolio — 66 drawings across structural, plumbing, and dewatering categories spanning local and international projects.
- Revit BIM models — two residential houses and a 5-storey commercial building from college design portfolio.
- SketchUp 3D models — 5 building models across residential and commercial projects.
- DewaPrice live app, VBA automation tool, and Python RC beam design calculator (in development).

PROFESSIONAL LICENSES

Licensed Civil Engineer (RCE)

PRC Reg. No. 0207132 · Board Rating: 86.7%
Valid until August 7, 2027

Licensed Master Plumber (RMP)

PRC Reg. No. 0024481 · Board Rating: 83.4%
Valid until August 7, 2028

EDUCATION

BS Civil Engineering — Major in Structural Engineering

2019 – 2024

Rizal Technological University

TECHNICAL SKILLS

Engineering & Analysis

SEEP/W · STAAD.Pro ·
Mathcad · Excel (Advanced)

Design, Drafting & BIM

AutoCAD · Revit · SketchUp

Automation & Dev

VBA · Python · JavaScript ·
Supabase · Vercel

Core Competencies

Dewatering · Hydraulics ·
Cost Estimation · QTO · Site
Management · Client
Coordination
